

Seafood from Vietnam

The world's preferred sustainable choice

Did you know?

In less than 2 decades, Vietnam has developed into the largest pangasius supplier world-wide, and 3rd largest shrimp exporter in the world. For seafood as a whole, Vietnam is ranked 4th. Moreover, the exports continue to grow. Not only in volume, but also in terms of destinations.

Higher quality, more sustainable

But the focus is not only quantity. Growth of the sector has gone hand in hand with innovation and upgrading of the supply chain in terms of quality and sustainability standards. Nowadays, the sector is characterized by:

- Premium quality for Pangasius with legislative support of the government (through implementation of decree 36)
- More value-added products for the entire range of seafood
- A fast growing number of pangasius & shrimp farms with international certifications on sustainable aquaculture, including ASC and organic certification
